HealthCare Logistics
a PHOENIX company

SETTING A NEW STANDARD

International studies appoint Denmark as the perfect gateway for warehousing and distribution of pharmaceuticals, medical devices and healthcare related products to the Nordic region. Through the past six years, several manufacturers have come to the same conclusion and established their Nordic pre-wholesale in Denmark – many of them with Nomeco HealthCare Logistics.

Nomeco HealthCare Logistics is the leading Nordic outsourcing partner and we support the pharmaceutical and biotech industry on warehousing and distribution and other specialist services related to pre-wholesale, clinical trials, sales support and many more.

Nomeco HealthCare Logistics has increased the business considerably during the past four years. On this basis, PHOENIX group and Nomeco HealthCare Logistics decided to build a new, massive and highly automated warehouse. The warehouse will be the future of Nordic healthcare logistics and will fulfill today's and the future wishes and requirements from the pharmaceutical manufacturers and the authorities. With this new site efficiency, quality and security are taken to a completely new level within healthcare logistics.

The new site is located in Køge approx. 35 kilometers south of Copenhagen with easy access to the highways. Copenhagen airport and the bridge to Sweden can be reached in less than 45 minutes.

We are looking forward to welcoming you in our new warehouse.

EFFICIENCY

Shortest lead time to the Nordic Region

Fast market access is essential to the pharma industry. Therefore, our new warehouse is built to support our clients with the shortest possible lead time. This is guaranteed by a high level of automation, speed of operation and availability of several new and smart support tools.

**Fast process
time and massive
capacity in daily
operations. Fast
track for urgent
orders**

**Inbound and
outbound
supported by
easy-to-use
online tools
and visibility**

**Perfect location
connecting the
Nordic and Baltic
countries with the
rest of Europe**

**Consolidated
transport and
most frequent
line hauls to
the Nordic and
Baltic region**

QUALITY

Built to meet future requirements

Nomeco HealthCare Logistics has 30 years' experience in ensuring the quality on our sites and in our processes. We have full risk evaluation of criticality towards patient safety, product quality, data integrity and guideline compliance. We have built state of the art when it comes to quality and we are ready to meet future wishes and requirements.

System, technology and building fully validated

Pallet-ID on each pallet to control/track pallet location

Ready to handle verification and FMD requirements

Smart system load-in of product dimensions, weight and photo of all products

Extensive temperature control and regulation in all areas

High level of automisation reduces risk of human handling errors

SECURITY

Highest level of security and safety measures

Your products are safe with us and the high security standard is a guarantee for protection of your values. We have thought of everything from strict entrance control to protection against power outage and disaster scenarios.

CCTV and thermo video surveillance in HD

Guard on-site 24/7

Installations, BCP and back-up systems handle potential disaster scenarios

Extensive security measures on-site

Special flow for authorised and approved drivers

Limited and controlled access to all areas

4600 Køge

PERFECT LOCATION

With easy access to the highways connecting the Nordic countries with the rest of Europe, Køge is the perfect location for Nomeco HealthCare Logistics' new warehouse for pre-wholesale activities for the Nordics and the Baltics. This is confirmed in European market studies appointing Denmark as the most optimal gateway to the Nordic countries. Køge is located approx. 35 kilometers south of Copenhagen. The large investment is based on analyses showing a further increase in and demand for Nordic pre-wholesale solutions in the years to come.
